We'll call this menu the Master File Menu as a point of reference,	0
although it contains more than just the master file screens.	0
We'll now examine the Test Data already in the program.	0
This data consists of 3 master records, 1 for each truck purchased.	0
Options 'A' and 'G' allow you to add or retrieve those records.	0
For now, let's examine the 3 records in the Master file by selecting	0
option 'G'.	0 0

You have just examined the 3 records in the Master File.	0
In the next tutorial, you will see how you can	0
customize this program to give it the appearance that	0
would make sense in your application.	0
As you navigate around the program, you will notice that entering	0
either 'R' or the 'RETURN' key will return you to the next higher	0
menu. In this way you can 'branch back' from menu selections	0
that are nested 3 or 4 deep, like an inverted tree.	0
