Copyit for Windows 3.0

Copyit is a Shareware program. You may freely copy and distribute this program so long as it's not modified and it's in the ZIPed format containing all original files. There is an order form at the end of this document that will help you in you registration process.

Copyit is a file management program that will let you copy, delete, rename, move, and many other items. To install this program, just simply copy all the files to your hard drive. To start the program run the file copyit.exe.

Included in the ZIP file are:

copyit.exe	42608 bytes
copyithp.hlp	15316 bytes
readme12.wri	4352 bytes

Controls

For version 1.2. You will need a mouse to operate this program completely. There are plans to have full keyboard support in a following version. To get help on use of the menus and commands, click on the help menu and select Help on Copyit. By hitting the right mouse button will bring up a floating menu.

New Features

Some of the new features in version 1.2 . Are the option to change the editor that you would like to use, you able to change the file listing to a more detailed listing, also you are able change the type of files listed by using the file filter. Increased the number of drive support to the full 26 logical drives. Other new features are you now are able to change the file attributes, there is the bytes free at the bottom of the files window. Others are the disk information, and if you have more that one window open and you copy or move a file to the drive and directory that another window is, it will update that window.
