Amortize - The loan amortization tool.
Version 1.x by Eric "E.T." Tremblay
Amortize is an amortization tool. This program allows you to quickly
see the difference between various interest rates and terms for
mortages. It will also display yearly interest paid on a loan, the total
interest paid, and total amount paid on a loan. It prints a table showing
interest and principal paid for each month, as well as the payoff for that

month.

Emerald1.0
Version 1.0 March 4, 1996 by Eric "E.T." Tremblay
Emerald is a great tool if you have a Green Line Stock Trading
Account at the Toronto Dominion Bank of Canada. It will
calculate the commissions on your stock transactions and it
also has an "Analysis" panel to help you take all the stock
prices (buy, sell) and commissions to help you make sense
of all these numbers. With this "Analysis" panel you will be
better prepared to make an intelligent stock trade.

HousePrice1.0
Version 1.0 September 6, 1995 by Eric "E.T." Tremblay
This app will permit you to calculate the percentage of your
offer in comparision to the asking price and the municipal
evaluation. It's a great helper when your house shopping and
dealing.

QTax
The Quebec Tax Tool
Version 1.1 by Eric "E.T." Tremblay
This application will simply calculate the 7% G.S.T. tax and the 6.5% Quebec provincial tax on a certain amount. It can also calculate the tax in inverse. Meaning that you give the application a final amount and it will calculate the tax so that it gives you the amount you wish.

RISK
by Dr. Mario Hilgemeier, 1992
A simple economic simulation about risk assessment
This "game" shall train your ability to quickly check numbers and to assess which of five risky options for action you should take.
Each action has a cost (this is what you must invest) and a success probability.
