Notes: This font is shareware, see below for details. I'm not quite certain if "Openface" is a valid weight, but I went with it and forced the files into that format.

KASTELLAR (Type 1)

Kastellar (based on Castellar) is a Type 1 (ATM-compatible) display typeface in uppercase characters only (no lowercase or numerals). It was created entirely with Letraset's FontStudio. It is a very elegant openface-styled design that until this offering, was only available in hot metal.

THIS FONT IS SHAREWARE !

I am asking only \$20 for Kastellar, with a free 10-day trial period to test it out and see if you like it. If you keep it any longer than 10 days you will feel guilty and send in your \$20, right? In exchange, you will be a licensed user and will receive free updates (of registered fonts only) by mail, and notifications when new fonts become available. Not a bad deal, eh?
