Chapter 1

Information

1.1 Welcome to the Learning Curve

THE LEARNING CURVE INDEX

First of all, Welcome to the TLC Compact Disc.

This Compact Disc is crammed with up to 650 meg of Educational software & text files, more than you have ever seen before on the Amiga! As well as hundreds of software titles all runnable from the workbench, there are over 200 of the most well known novels all cut into chapters, So all books etc, will load from any basic 2 meg Machine with Amigaguide. Also included are hundreds of poems, great plays & many of the great works of philosophy & much much more!.In fact so many programs that we thought that we better include this Index for you to find your way around!!

Welcome!

1.2 acknowledgement

ACKNOWLEDGEMENTS

First of all, thanks must go to all of the programmers, artists and compilers of Amiga PD and shareware without whom a compilation such as this would be impossible. However several of the programmes and some artwork on this CD are NOT PD, and are presented here by special permission.

Special thanks must go to the following:

David Gallagher for the Ray Traced intro animation and for lots of help with animations and graphics.

Chris Hill and S.P. of Total Concepts (Copyright © Total Concepts), for permission to reproduce here the entire Total Concepts series of educational books, which until recently were selling as Licenceware.

Many thanks Chris!

John Moss of Papillon Graphics (Copyright © Papillon Graphics 1996), for the great artwork of well known authors, Many thanks John. The drawings are free for private use, but permission for any redistribution must be requested from John Moss himself.

Address Below:

John Moss,
Papillon Graphics,
"Parkways"
113 Singleton Road,
Salford,
M7 4LD.

Telephone/Fax : 0161 - 795 4463.

Many thanks must go to Pig3 publications (Copyright © Pig3 Publications), for permission to use some of their pictures, poems and biographies of the great Poets.

John Dell for sending new versions of your software, and the extra art disks, many thanks.

Gerard Fitzpatrick for permission to use his comprehensive World Cup program, many thanks.

Thanks must also go to Hugh Gammon for providing us with the last work of Rob Baxter who tragically died earlier this year aged only 39. Most of Rob's greatest classical music pieces are included on this CD for you to enjoy. Thanks Hugh for all the updated music disks, and for your Tribute to Rob.

Hugh has informed us that he will be continuing the Desktop Music Workshop on his own and he is presently working on a version of Rossini's "William Tell Overture". We wish him well.

(All tracks by Rob Baxter and Hugh Gammon © The Desktop Music Workshop.)

Thanks must also go to Kevan Craft of Midicraft for his Tribute to Rob Baxter and "Spirit of the Dance" music track dedicated to Rob.

(Note that you need Midi equipment to hear this track).

Many thanks to Paul Broadbent for the huge (13.5mg) tutorial on photography. Great stuff Paul!

Also thanks to Nicholas Blachford for his latest version of Aural Illusion. Much appreciated.

Many thanks to all those PD designers of the Magic Workbench icons, without which this product would have looked far more drab.

Soundsamples used in intro, © Aris Entertainments 1991.

1.3 copyrights

The Learning Curve CD by Surge Productions

distributed by Weird Science

Some of the files on the compilation are copyright and you should not assume that in buying this set you have ownership of it's contents.

Rather you have permission to use the contents as you see fit. Some of the files on this set have been declared Public Domain or Shareware by the original authors, please comply with their requests. Weird Science have used their best efforts to ensure that all the aformentioned files on this CD Rom comply with the authors intentions and supply the programs designated as Public Domain or Shareware free of charge. No part of the purchase price of this CD Rom set has been made for any of these programs.

Included on this CD are the entire Total Concepts multimedia books, (Copyright © Total Concepts). Please note that although you can use them for your own use, they are not for redistribution on either floppy disk or CD media. The same applies to the History of the World Cup program (Copyright © Gerard Fitzpatrick) & the artwork for the books (Copyright © Papillon Graphics).

Surge Productions Compilation, Copyright © 1996, All Rights Reserved.

1.4 getting_started

Just a few notes to get you started.

All the files required to run the various programs are on this CD. To ensure that the programs can find all the necessary files please run the ASSIGNCD icon before loading any programs.

HINTS AND TIPS

Helpful hints for when things don't quite happen the way they should....

I have just booted this CD into my Workbench and the colours don't

look right!!!, Well please read on to solve this easy problem!!!

This CD has been Setup with MagicWB icons and an 8 colour palette so if the colours look a bit strange on your system, and you already have an 8 colour workbench, Click on the ASSIGNCD icon first, now clicking on the FixColours icon will correct these to the right palette.

For beginners who may need some help!!

On the other hand,if you are still using 4 colour Workbench and want to correct the colours you will need to change your Workbench to 8 colours first.

STEP 1, Open up your Workbench Prefs drawer,

STEP 2, Select ScreenMode,

STEP 3, Change to 8 colours and either use or save prefs to your hd,etc.

STEP 4, Click on the ASSIGNCD icon so that it can find it's palette

STEP 5, Now click on Fixcolours icon!!

This CD should work on all Dos 2.04 to Dos 3.1 machines, bearing in mind that you probably wont get everything running on a particular machine. However most programs seem to be quite happy on most systems.

Please Read the documentation to any program that is troublesome.

A couple of Programs (plotters,etc) need RexxMast to Run, Just Open the System Drawer on the CD, now click on the RexxMast icon to install into memory. Now select the plotter,etc again

Please note that although this CD will boot and load on a CD32, unless you have a mouse and keyboard the amount of software you will be able to access will be severely limited. Users with SX32 or SX1 machines should have no problems.

Mode Promotion & DBL Pal or Productivity

You will probably find that most programs will run on a high end Amiga such as a 4000 without problems. However there are a few points to watch.

If you use a multisync monitor and mode promotion, many programs will benefit from the flicker free hi-res graphics suchs as plotters or Cad programs. However you will probably find you will have to switch off mode promotion for a few of the old programs to enable them to run.

Some of the patches used on this disk also don't like mode promotion and DBL Pal or Productivity screens. In general the simpler your display setup, the more programs will work.

Tips on how to reclaim Memory

1. Close Windows

Small amounts of RAM can be gained by closing windows on the Workbench

2. Disable Drives

Hold down both mouse buttons and reset the Amiga to access the Early bootup options, Any or all drives can be disabled. Each disabled drive will free up more memory

3. Coldstart

Continually resetting any computer without switching off first will eventually lead to programs failing as the memory is not completely cleared. If problems occur then cold start the machine by switching it off for 20 seconds.

4. FastRam

You could always put a Ram expansion on your Christmas shopping list!! This would solve most of the problems with Memory!!!. Look at the poor PC USER'S who have to buy extra ram just to run Windows 95???

5. Flush

We have included a small Flush program in the system Drawer which will also help to cleanup memory by flushing out Libs,Fonts,etc which are no longer needed by the programs, We found this very useful with Machines that only have 2 meg of chip only.

We would also like to point out that there are a couple of programs that will not run with only 2 meg. We apologize for this inconvenience but it seems that more and more people are upgrading their Amiga's with FastRam. And thought that it would be a shame to leave these programs off this CD! Surge Productions and Weird Science have tried to make this Compact Disc as compatible with as many types of Amigas as possible. However compromises have had to be made. Not all programs will work on all platforms and it may be necessary to reboot the machine between each program, especially on low memory machines..

You will probably find the majority of programs will work on your system, however AGA only programs will only work on Amiga 1200, 4000 or CD32 systems. Also you may find if you have an accelerated AGA machine or an Amiga 4000 you may find some older programs may not work, in particular old Amos programs often have screen corruption when run on such machines. Remember many Amos programs can be exited by pressing Control - C.

Have Fun!!
