The CD-ROM Source
DEMO

You may run the demo within "The Disk!" or to install the CDRS Demo separately, in Windows Program Manager,

    select: FILE
    then: RUN
    then type: D:\dirname\SETUP

(In place of D in the above, put the letter for your CD-ROM drive and in place of dirname put the name of the directory where this README.DOC file is located.)

Once the Multimedia Viewer Runtime has been installed, run the demo by clicking on the CDRSdemo icon. We hope you enjoy this tour of just a few of the disks available from:
