

Hello!

Thank you for your interest in *Adventures with Oslo: Tools and Gadgets* -- another fine Science for Kids product. This README file contains information on the system hardware and software requirements for running the *Adventures with Oslo: Tools and Gadgets* Demo. Since no setup or installation is required, you can run the demo right from the *CD-ROM Today* interface as long as your system is configured as specified below. **Please note** that your display adapter **MUST** be configured to display 256 colors at 640 x 480. If you attempt to start the demo in any other video mode, you will almost certainly get a General Protection Fault that will cause Windows to crash.

HARDWARE GUIDELINES:

- * IBM PC or compatible with 80386SX/25MHz processor or better
- * minimum of 4 MB RAM, highly recommend 8MB RAM
- * MPC compatible sound card
- * MPC compatible CD-ROM drive
- * Super VGA Display Adapter and monitor configured to 640 x 480, 256 colors
- * Windows compatible mouse required
- * Dos 3.1 or higher
- * Windows 3.1
- * Microsoft Extensions for CD-ROM 2.2 or higher

STARTING THE *Adventures with OSLO: TOOLS AND GADGETS* DEMO FROM THE FILE MANAGER:

1. Be sure that *TheDISC3* is in your CD-ROM drive.
2. Open the File Manager by double-clicking on the File Manager icon.
3. In the File Manager click on the drive icon of your CD-ROM drive.
4. Find the file named OSLO.EXE in the OSLO directory of *TheDISC3* CD and double-click on it.

STARTING THE *Adventures with OSLO: TOOLS AND GADGETS* DEMO FROM THE PROGRAM MANAGER:

1. Be sure that *TheDISC3* is in your CD-ROM drive.
2. In the Program Manager choose "Run..." from the "File" menu.
3. Type in the drive letter of your CD-ROM drive followed by a colon (:), a backslash (\), OSLO, a backslash (\), and OSLO.EXE. Then press the "Enter" or "Return" key.
For example, if your CD-ROM drive is designated "D", you would type:
d:\oslo\oslo.exe [Enter]
