**Microsoft to Release Windows NT Device Driver Kit in Europe
In Conjunction With Two-day Developer Conference
November 5-6**

Paris, France. -- September 11, 1992 -- Microsoft Europe today announced the Windows NTtm Device Driver Kit (DDK) will be available for European developers in pre-release form November 5 in conjunction with the Microsoft *Windows NT* Device Driver Developers Conference to be held in London, UK, Nov. 5-6.

Just a week after the Windows NT DDK Conference in Anaheim, California on October 26-28, the European conference in London provides an excellent opportunity to receive the same information, tailored to the European developer.

The conference will feature highly technical information needed to write hardware drivers for Windows NT, display, input, printer and communication drivers. Attendees should have a good working knowledge of device drivers for other platforms and C programming. Sessions' topics at the conference led by key Microsoft developers, designers and architects, will include:

- Systems Strategy
- Windows NT Overview
- Windows NT Executive
- Windows NT Hardware Issues
- Windows NT I/O System Overview
- Device Driver Architecture
- Windows NT Device Driver Interface
- Windows NT DDK

Specific breakout sessions will concentrate on Displays, Printing and Communication Drivers.

Developers can register for the conference by calling +44(256)381106 and by writing or faxing to:

Microsoft European Windows NT DDK Conference
P.O. Box 1056
Ascot
Berkshire, SL5 7BR
UK
Fax: +44(256)381107

The registration cost is £450 before October 23, £500 from October 24 on. Conference attendees will receive a copy of the Windows NT DDK along with the Windows NT SDK CD and the Developer Resource Kit CD.
