## Introduction

Features of NCSA Telnet *v*

Differences between Version 2.5 and Version 2.6 *v*

- New Features in Version 2.6 *v*
- Discontinued Features *vi*
- Bugs Fixed from Version 2.5 *vi*

System Requirements *vi*

Notational Conventions *vi*

## 1 Getting Started

Installation Note *1-1*

Beginning an NCSA Telnet Session *1-1*

Opening and Closing a Connection *1-2*

- Opening a Connection *1-2*
- Logging on to Your Host *1-3*
- Setting the BACKSPACE/DELETE Key *1-3*
- Setting a VT Terminal Type *1-3*
- Emulating the VT Terminal Keyboard *1-4*
- Closing a Connection *1-4*

Copying, Pasting, and Printing *1-5*

- Copy and Paste from the Edit Menu *1-5*
- Print from the File Menu *1-5*

Ending an NCSA Telnet Session *1-6*

## 2 Configuration

Global Preferences *2-1*

New Configuration System in Version 2.6 *2-3*

- Default Configuration Records *2-3*
- Editing Configuration Records *2-3*
- Editing Terminal Configuration Records *2-4*
- Editing Session Configuration Records *2-5*

Changing Configuration after Session Connected *2-9*

Saved Sets *2-13*

- Saving a Set *2-14*
- Using a Saved Set *2-14*
- Loading a Saved Set *2-15*

Macro Definitions *2-15*
Reverting to Previous Macro Definitions *2-16*
Saving Macros *2-16*

## 3 Advanced Features

Cursor Positioning with the Mouse *3-1*
Multiple Connections *3-1*
Opening More Than One Connection *3-1*
Moving between Connections *3-1*
Rules for Session Names *3-2*
The Connections Menu *3-2*
Naming Windows *3-2*
Checking Session Status *3-2*
Aborting Connection Attempts *3-3*
Changing a Window Title *3-3*
The Network Menu *3-3*
Telnet Commands *3-3*
Network-Related Commands *3-4*
Authentication and Encryption *3-5*
Preparing Your Environment *3-5*
Activating Authentication and Encryption in NCSA Telnet *3-6*
Indicating Active Encryption *3-7*

## 4 File Transfer

File-Transfer Terminology *4-1*
About FTP and NCSA Telnet *4-1*
Using an FTP Client *4-2*
Configuring an FTP Server *4-3*
Controlling Access *4-4*
Preparing to Transfer Files *4-5*
Invoke FTP on the Host *4-6*
Issue the FTP Command *4-6*
Enter Additional FTP Commands *4-6*
Set the Transfer Mode *4-7*
Change the Current Directory *4-7*
Transferring Files *4-7*
To a Macintosh *4-7*
To a Host *4-8*
Multiple Files *4-8*
MacBinary Files *4-9*

## 5 Tektronix Graphics

Tektronix 4014 and 4105 Emulation *5-1*
- Starting a Tektronix Emulation *5-1*
- Tektronix-Related Commands in the Session Menu *5-2*

Tektronix Graphics Windows *5-2*
- Detaching *5-2*
- Deleting *5-3*
- Zooming and Unzooming *5-3*
- Copying *5-4*
- Resizing *5-4*
- Printing *5-4*

## 6 Interactive Color Raster Graphics

Using the ICR Protocol *6-1*
- Starting and Quitting ICR Graphics Emulation *6-1*
- Allocating Memory *6-1*
- Copying an ICR Graphics Window *6-2*
- System Color Problems *6-2*

Creating an ICR Program *6-2*
- Escape Sequence *6-2*
- ICR Commands *6-2*
- ICR Command Parameters *6-3*
- Color Maps *6-5*
- ASCII Encoding *6-5*
- Run-Length Encoding *6-5*

Sample ICR Program in C *6-6*

## A Troubleshooting

New Error Messages *A-1*
- Nonfatal Errors *A-1*
- Semifatal Errors *A-2*
- Fatal Errors *A-2*

Old Error Messages *A-2*

## B VT Emulation

VT Compatibility *B-1*

Key Mapping *B-1*

Escape Codes *B-1*
- Editing Keys *B-1*
- Cursor Control Keys *B-2*
- Auxiliary Keypad Codes *B-2*
- Top-Row Function Keys *B-3*

## C Obtaining NCSA Software

Anonymous FTP Server *C-1*
Archive Server *C-2*
U.S. Mail *C-2*
