

Password Changer for NetWare V 1.2

For the past year I have looked for a simple Windows program that would allow me to quickly change Novell NetWare passwords. Since I could not find just what I wanted, Password Changer for Windows was born. The program is written in Visual Basic and makes calls to four DLLs from the NetWare C Windows SDK. I am a LAN Administrator for a large multi-server NetWare network, and the Password Changer has made the boring task changing passwords very easy and painless.

Requirements:

Novell NetWare 2.x, 3.x

Windows 3.x

VBRUN100.DLL (Visual Basic Run Time)

NW*.DLL (All DLLs files included with NWPC.EXE)

ENOUGH TRUSTEE RIGHTS:

You must be a Supervisor or equivalent

or

Manager of user account to be able to change passwords.

Credits:

Password Changer for Windows took many hours to code, test, and debug. If you value your time and find this tool useful (I am sure you will), please consider sending a donation of \$8.00 in US currency to:

Carlos Isturiz

7306 Mesones

Houston, TX 77083

Your donation will encourage improvements to this application, new development, and will allow me to send you any updates. If you have any comments or suggestions please send them to the address above, Compuserve: 75540,2073 or INTERNET: 75540.2073@compuserve.com

Since I dislike crippled SHAREWARE software or persistent nagging screens, this program is fully functional. The only hint of its SHAREWARE nature is discovered after pressing the ABOUT button.

Development Environment:

Password Changer was developed and tested on a Novell NetWare 3.11 NOS using IPX 3.10 and NETX 3.26.

Windows 3.1

DOS 5.0

Dell 486P/66

Installation:

Copy all files to C:\WINDOWS\SYSTEM
Run NWPC.EXE
Make sure you don't have older versions of NWCORE.DLL,
NWWWKSTN.DLL,NWBIND.DLL,NWSERVER.DLL or NWCONN.DLL in you
path.

NetWare and the Novell Logo are Registered Trademarks of Novell Inc.
