

Included here are the files necessary to install the 2Do Personal Task Manager for the Microsoft Windows environment. If you have downloaded the files to your hard disk and want to setup from a diskette, copy all of the files onto one 1.2MB 5.25" or 1.44MB 3.5" diskette. If you want to create a set of smaller disks from your hard disk or from a single high density diskette, run the IMAGE.BAT file included. IMAGE.BAT will create two 720MB disks.

To setup up 2Do:

- run Windows
- open File Manager
- choose the Run command from the File menu
- enter the path to the SETUP.EXE program
- click OK
- follow the instructions on the screen.

Make sure you read the Introduction file. It contains information on how to use the on-line help file to list the features of 2Do and to find the instructions on how to use them.
