### 1.2 Imagine Objects

vh5150.lha      Guitar based on Eddie Van Halens famous red,black and white stripey design. The pattern is applied with coloured faces rather than brush mapping. Has a tremelo arm etc.

SportCar.lha    Imaginary prototype sports car.

FightPln.lha    Imaginary prototype jet fighter aircraft, unusual because it's a biplane.

Daleks.lha    The worst enemies of Dr Who. The object is mainly black, and is grouped so that the moving parts can be animated. There are two versions in the archive, which use faceted and non faceted spheres. These require 2.5M and 5M memory respectively to scanline render.

FaceMask.lha    Low resolution face shape. Ideal for use as tribal mask.

sonic.lha    S\*nic the Hedgehog object. Yes the star of many a video game comes to your favourite rendering package!

---

lemming.lha Simple version of the cute characters from the Psygnosis games. Cycle object which can be animated.

DinoVr.lha Dinosaur object based on a velociraptor. Uses Imagine 3.0 textures. The object size is 550K and requires quite a bit of RAM to render!
