Thanks

### 1.2 intro

Welcome to AmosWeb V.01

It accured to me that there must be alot of Amos Programmers out there that come across problems when progamming, and no one to turn to, your ok if you are on a WEB site, but for those of you who aren't it can be abit of a pain.

So I thought of a program, like the Web Browsers, that can be interactive on a CD, such as The Amiga Format CD. Then after a bit of poking and proding AmosWEB was delivered, a bouncing baby browser...

To find out how to use AmosWEB, click this button - Usage

### 1.3 Legal stuff...

Legal stuff:

AmoWEB is a Gift! That means that it may be copied and passed at will, as long as all files of the original-archive (see below) are copied!

---

These Files must be copied in any case:

```
AmosWEB/                : the main drawer
AmosWEB.info            : and its icon
AmosWEB/AmosWEB_V.01    : the main-program
AmosWEB/AmosWEB_V.01.info : and its icon
AmosWEB/Answers.AW      :Answers Drawer
AmosWEB/Answers.AW.info :and its icon
AmosWEB/Questions.AW    :Questions Drawer
AmosWEB/Answers.AW.info :and its icon
AmosWEB/AmosWEB.guide   : English Guide
AmosWEB/AmosWEB.guide.info : and its icon
AmosWEB/RealityM&SCScreenshot.IFF :Screenshot
AmosWEB/RealityM&SCScreenshot.IFF.info :and its icon
```

All files have to be passed the way the Author has released them,  
THEY MAY NOT BE MODIFIED IN ANY MANNER!

The author takes no responsibility for the use or misuse of AmosWEB, USE IT  
AT YOUR OWN RISK!

## 1.4 Installation...

Installation:

The installation of AmosWEB is very simple:

Drag the main drawer ( AmosWEB ) to where ever you like, thats it.

## 1.5 How to use AmosWEB...

Once you have run AmosWEB, you will be faced with a simple Interface.

Starting from left to right :

Printer Button. ( to print a document )

Page up. ( to read a page at a time )

Line up. (to read a line at a time )

Quit. ( to leave AmosWEB )

Load a AmosWEB.AW file. ( to load in either a question or an answer to read )

It's easy or so he say's...

There are four small files that have been included with this software:

In the Questions drawer - From\_CS\_To\_All\_2256.AW and

From\_M\_To\_All\_1345.AW

In the Answers drawer - To\_CS\_From\_RC\_2145.AW and To\_M\_From\_C\_1430.AW

Now let me explain how it works, if you've got a problem that you would like  
answering then with a text editor such as Finalwriter enter your name at the top ↵  
of

your letter, be it your full name or a nick name of your choice now enter your ↵  
subject

then your problem.

If it is an answer that you are giving then start your letter with whom it is ↵  
directed to,

followed by the subject and then the answer and at the bottom of your letter your name.

EG:

To go into the Questions drawer:From\_DJF\_To\_All\_1432.AW

Save AS- From\_Your Initials\_To\_Everyone\_Time and you must enter.AW to the end.

-----

Name David J Foster

Subject: Looping

followed by the question.

Then save your file as described above.

And if it is an Answer then it goes like this.

EG:

To go into the Answers drawer:To\_DJF\_To\_JJ\_2245.AW

Save AS- To\_There Initials\_From\_Your\_Time and you must enter.AW to the end.

-----

To David J Foster

Subject Looping

here enter your answer to david

and finish off with your name.

From JJ.

Bye...

Check out the four files that are included, start with opening a Question file ↔  
then

when you have read that go to the Answers drawer and select the corresponding Answer. EG:

If the file that you just loaded was a question under the name of

From\_HDS\_To\_All\_1642.AW

Then you would need to look for an answer under the name of

TO\_HDS\_From\_SJ\_1934.AW

The .AW at the end of the files is very important, so DO NOT forget to include it.

Include the Time as this makes the file that much more harder to clash with, if ↔  
the  
same names are used.

When you've created your text file file then Full Format a Disk and Name it either Question or Answer depending on what it is that you are sending in and on the ↔  
front

of your envelope or package wright AmosWEB - Question or AmosWEB - Answer.

If you are sending in a Question or Answer, then send it in to Amiga Format 30 Monmouth St, Bath, Avon BA1 2BW . Sorry but disks can not be sent back.

Then it's a case of just sitting back and waiting for a replie on forthcoming ↔  
Amiga

Format Cd's. All Questions and Answers will only come from Amos user's that use this new AmosWEB.

---

## 1.6 Author

Bug-reports or ideas to:

Back to Back Software  
46 The Moat  
Weston Coyney  
Stoke-on-Trent  
Staffordshire  
ST3 6NB

## 1.7 Thanks...

BIG thanks and greets go to:

Amiga Format

Nigel (Betatester)

Gateway (for buying the best computers around!)

## 1.8 Soft

REALITY MUSIC AND SAMPLE CONVERTER  
By Back to Back Software

-----  
If you own the Reality Game Engine or are thinking of purchasing it, then is Converter is for you. With the Reality Game Engine you can only use music and samples that have been provided with the Game Engine. No longer does that apply. This Converter will convert Mods to Reality Game Engine, Music Format .MUS and Samples to Reality Game Engine, Samples Bank .SAM

To view The screenshot of The Reality Music and Sample Converter, simply look for Screenshot.IFF from within the AmosWEB drawer and double click.
