Chapter 1

Gloom

1.1 HEEEELLLLLLPPPPP!

Cheat for Gloom. Created by Craig Thorburn for
Craig Thorburn Productions

Imagine the scene. There am I at my trusty (well, almost) A1200 loading up what promises to be a brilliant Doom clone spectacular.

Hands twitch on the keyboard keys as the game readies itself. I'm prepared. I've read the book that came with the game and I feel ready. Game on. (Good title or what?).

Couple of weeks later I think to myself:

Gosh!, I wonder if there is a way to get passed level 2.3?
And behold there is!, thanks to my rudimentary knowledge of Amiga commands and a bit of luck you to can enjoy the thrill and exiliration of LEVEL 3, or (more appropriatle) the HELL LEVEL!.

About me	Nosey little fellar ain't ya?
Why the hell....	Why did I spoil the fun?
Installation	How do I use it?.....
Right and legal thingabobs	Court?, that's tennis, isn't it?
Bugs and history	In 1873.....

1.2 About Craig Thorburn

Hi!. Nice of you to drop by! [ahem].

Anyway, my name is Craig Thorburn and I have been on planet Earth for 17 years now, though some of (in fact most of) my friends say I left long ago.

I live in Scotland and if you find that you use this bit of software regularly don't send me anything.

Shareware - nice idea.

Give away free ware - even better.

But if you do, write to me at:

21 Hillview Avenue
Georgetown
Dumfries
DG1 4DX.

Any money, gift tokens or other financial gifts will be gratefully recieved as I am about to join the poorest, most mis-represented class of society - the college student.

Ho hum, such is life [sigh]. Thanks for buying AMIGA FORMAT and keep buying it (is it just me or are the selling type figures at the back of the mag going down too much?).

I should crack another game in about 20 years or so, so until then:
Keep cheating!, and remember : Incest - the game for all the family!

My system specs:

An Amiga 1200
Turbo 1230LC
4MB fast ram
2MB chip ram
Workbench 3.0
320 Mb Hard drive
Reno x2 CDROM
Squirrel SCSI
HP Deskjet 400
Quickshot "Multimedia" speakers!

1.3 why?.....Why?.....WHY CAN'T I FIND THE SECRET ROOM?. oh there it is!

All of you may be wondering "Why did that #@£!~££%^ Craig £"\$%! Thorburn make this !\$%\$!£ cheat for Gloom?", but then again some of you won't.
The reasons are:

- 1) I wanted to be famous :-)
- 2) I wanted to get my name in print :-))
and
- 3) I couldn't get passed level 2.3 :-(

Since the cheat has probably failed at points 1 and 2, it is reassuring that it does (at least on my system) succed on point 3!.

My system specs are in the Personal section.

That's it, no more reasons.

1.4 The Long arm of the law!

It's a fair cop!. I'm not sure if anyone else has thought, or done this sort of thing, or even if it is allowed. If it isn't: my humbilised apologies to Black Magic and associates. However if it is: jump up and down to look stupid, and for joy!.

THE ACTIONS OF THE AUTHOR OF THE CHEAT AND OF THIS AMIGAGUIDE DOCUMENT ARE ONES OF AN EXTREMELY INTELLIGENT AND SANE MIND - BE WARNED - THIS MAN IS EXTREMELY NORMAL AND WILL PROBABLY ATTEMPT CONVERSATION WHEN FEELING HAPPY/CONFUSED, OR BOTH.

1.5 Oh dear - It's just crashed.

The version that is being used is version 3. Hence there have been 4 versions before it (v1.0, v1.5, v2.0, v2.5) or 4 previous versions which are worth mentioning.

v0.00
First thought about it
Reasoning process came out with an answer
DO IT!

v1.00
Basic thing set up.
Works
But is about as user friendly as a slap in the face (with a cold salmon)

v1.5
Things got a little better
Using Complicated routines!

v2.0
*&%£""""^%"" previous version didn't work at all
And neither does this one.

v.25
FINALLY!
Works like a dream.
Just input desired level and VooooooooOooooooooMMMMMMMMMMMMmmmm!

v3.00
yes....Yes.....YEs.....YES!
Took a tip from AMIGA FORMAT, (natch), new icon has been based on AF's
script start up!
New icon for Cheat program.
Has it's own window an' everything. Look!, isn't it COOL?

Bugs:

Not alot (I hope) however I MUST warn you: run the "Back it up"
program BEFORE, not after, the Cheat program otherwise you may reek havoc on
your computer. Also you MUST exit the GLOOM program, don't switch off your
computer to exit, other wise catastrophe will befall you!.

1.6 Errrr, how do I get this damn thing working?

Ok. I suppose you will want to install this little cheat onto your system
eh?. Well all you have to do is run the Installation program bundled with
this cheat, answer a couple of questions, tell it where you put your GLOOM
game and sit back back. Relax. Be peaceful while it does all the work.

That's all. Nothing more, nothing less.
