Chapter 1

History

1.1 History

- * 0.97a (3-4-98)
 - Hopefully got rid of all spelling errors in the documentation.
 - Public release.
 - * 0.97 (2-4-98)
 - Slide show option fully operational.
 - ARexx functions completely rewritten & extended.
 - Public release.
 - * 0.96 (26-3-98)
 - Screen selection preferences for screen display type fully operational.
 - Public release.
 - * 0.95 (19-3-98)
 - Inability to open locale.library is now handled correctly.
 - Preferences window completely rewritten.
 - ToolType handling completely rewritten.
 - Replaced graphics/ClipBlit() with cybergraphics/WritePixelArray(). Should reduces memory requirements slightly.
 - Small timer adjustment in window handling subtask. Saves some cpu time under certain conditions.
 - JPEG preferences fully operational (except for color quantization & related) ←
 - .
 - Screen selection preferences for window display type fully operational.
 - Center window option operational.
 - Use RMB option operational.
 - EOF wasn't handled as -1 but 2^32-1 instead. Fixed.
 - No public release.
 - * 0.94 (18-1-98)
 - Version string complies to official standard now (software remains beta !).
 - Added installer script.
 - Progressivly encoded images were not handled correctly. Fixed.
 - Workbench startup handling encountered an endless loop. Fixed.
 - Fixed silly bug in shell startup code. Found that one only accidentally.
 - Window scrolling should be smoother now.
 - Added cpu check.
 - Added an fpu version of the 68k executable.
-

- Public release.

- * 0.9Beta3 (4-1-98)

- Localized.
- Many internal changes, improvements & bug fixes (hopefully...).
- Added experimental ARexx port.
- Public release.

- * 0.9Beta2 (31-12-97)

- Window handling is subtask now.
- Window scrolling should work now if parts of the window are covered.
- Renamed due to a name collision on Aminet.

- * 0.9Beta1 (28-Dez-97)

- First public release.
-
