1.2 Requirements

To use 102 Game Cheats you will need:-

1. Multiview
2. Amigaguide.library (if you have Multiwiew, you should have this)
3. An Amiga
4. A moniter/tele

If you have all these, this guide should work without any hitches.

1.3 Using This Document

If this is the first time you have used an Amigaguide document, then I suggest you click on that handy 'Help' button at the top of the screen.

Now, the basics. If you want to go back to the main page (the one you just came from), just click on the 'Contents' Button at the top of the screen.

It should be pretty simple to get to the actual cheats, so I'll take off from there. Most of the cheats will be in CAPITALS. This does not mean you have to type them in capitals. First try them in lower case, if that doesn't work try it all in CAPITALS, then try putting just the First Letter Of Every Word In Capitals. If none of these work, then there is probably something wrong with the cheat. In this case, common sense can be used. For example, if I had written the cheat/level code as TILL THE COWS COME HOAM, the a bit of common sense will tell you that it should be TILL THE COWS COME HOME (and I hope you realised that before I typed it out). But always type what I have written first, because you never know...

1.4 Please...

You do not HAVE to give me anything for this guide, but if you know any cheats which are not included in this guide, have any ideas on how to improve it, or have found any problems with it, please write to me at this address:-

Mr.D.C.Richards, (please put the 'c' in)
39 Mill Road,
Pontllanfraith,
BLACKWOOD,
Gwent,
Wales.
NP2, 2LU.

if you want to see more comprehensive versions.

I would also appreciate it if you sent me some simple notes on creating Amigaguides, and some of these faces-e.g. ;-) , so I can put a bit of personality into this document.

1.5 History

History is something practiced by historians...Oh sorry, you want the history of this guide? O.K. then.

I started writing this guide in May 1998, because I wanted to put all the game cheats and level codes I had accumulated into some kind of order, so I decided on the Multiview document which you are reading now. There was only one problem-I didn't actually know how to write Amigaguide documents. I searched my Amiga Format magazines and CD's, hoping to find a tutorial on the subject, but to no avail, so I decided to teach myself. So if there is something wrong with this guide, it's because I'm not exactly an expert.

Most of this guide was written using Wordworth, but the finishing touches

were applied with various text editors, because I find them easier to use.

If people send me their own cheats, this will just be the first of a series, but if you want newer versions I need feedback from you. See [Please...](#) for more details.

1.6 Why?

If you were hoping for the answer to life, the universe, and everything in this section, you might be disappointed. Okay, you will be disappointed. But enough of this waffle, and down to business.

Firstly, I did not make this game guide for it to be abused. It is so you can get the full value of any game you have bought. For example: say you bought Humans 3 for 20 quid. There are 80 levels, so if you get stuck on level 20, the game has only been worth 5 pounds. But using this guide, you can quickly look up the code for level 21, and be on your merry way. This is how I meant it to be used, anyway.

1.7 Apologies

I am sorry if the game you were looking for wasn't in this guide. But this is just the first of many installments, so if you are patient, you should finally find what you want. But no promises.

I also apologise for anyone who was looking for complete guides to games. There are two reasons I have not included any of these:-

1. Once the game had been completed, you would never touch it again, and
2. It's just too much trouble to type out (especially when you can only type about 10 words a minute, like me).

There are also bound to be mistakes in this guide. I put this down to three things:-

1. I only just learned how to make Amigaguides
2. Many of the cheats are from un-reliable sources, and
3. Nobody's perfect (as Eccles would say).

1.39 Elite 2-Frontier

For loads of cash:-

Jump to the Cemiess system (-2,-2). When there, fly to Williams Relay which orbits Donaldson. Log on to the Bulliten Board, and look for Patricks Exchange. If it is not there, speed up the time until it appears. Once you are in it, you will see that precious metals and gem stones have a negative value, so you get paid for taking them away. If they have none in stock, speed up time until some appear. Then sell everything on your ship, and fill your hull. Now part-exchange your ship for something like another Eagle. Keep on doing this until you have loads of cash!

To improve your Elite rating:-

Buy a 30mw mining lazer, and fly to one of Mars's two moons. Now keep on firing at the moon with the mining lazer (speed up time to make it quicker), but make sure you don't run out of fuel. If you do it for long enough, you should end up with an Elite rating of Elite!

To jump 50,000 light years in one go:-

Jump from Sol to co-ordinates (60,57)

1.40 Theme Park

Enter your nick name as MARKL. In the game, press C for more money, ALT+Z for all the rides, AMIGA KEY+Z for all the shops, and X for all the scenery and toilets.

4. Save the game
5. Replace the new 'base.dat' file with the copy of the original (don't forget to rename it to 'base.dat')

1.58 Syndicate

One of the most un-reliable cheats in this guide, but a cheat none the less:-
For more money, leave the game on the map screen for a long time, overnight is probably best (but this is not advised if you hate a large electricity bill)
But if you want to play a bit safer, type these in as your company name:-

ROB A BANK-Gives you 1 million credits
COPER TEAM-Gives you more weapons and money
WATCH THE CLOCK-Makes time speed up
MARKS TEAM-Gives you top quality agents
OWN THEM-You will own all the countries
NUK THEM-You are able to start anywhere.

1.59 Liberation

A very awkward tip, so follow these instructions carefully:-

Click on a power point in the wall (for recharging) and do the following while the power is flowing: face away from the wall and select a cred card from a backpack. Using the mouse, look down at the floor, and, still looking down, attempt to use the cred card without looking up. Keep on trying to use it, and after a dozen or ↵ so clicks, you can release everything. Look up, and wait for the electricity to stop flowing. Pick up the cred-card in front of you, and no matter how many times you pick it up, it should still be there. There! If you can do it, it's money for ↵ nothing

1.61 Populous 2

If you can use TREES and have RAIN OF FIRE or COLUMN OF FIRE in the fire section, then it is simple and cheap to destroy your enemies. Just cover the enemy land with trees, then set fire to them with one of the mentioned spells, but make sure the trees are close enough to set each other alight.

The code for level 999 is-WOITAB

To build up your ammo, without all those pesky aliens getting in your way, simply pick up the two ammo boxes in the first room, then hit ESC. Select 'Play Game' again, and repeat the above process as many times as you want.

To become invincible, play up till level 2 with all that lovely ammo you've got, and get killed by the large red robot, which is very easy to do. Once you die, don't press ANYTHING and wait for about half an hour (this isn't the longest cheat in this collection by a long way). Now, when you come back, you should have an energy reading of 999, and be invincible.

1.72 Diggers CD32

To collect loads of jewels without hardly moving, follow these steps:-

1. Dig a tunnel horizontally about five squares across.
 2. Dig down one square, and diagonally up so you are level with the first tunnel.
 3. Now dig down the smaller part of the tunnel to remove it, and you should have something which looks like a castle's battlements.
 4. Now put a Digger in these tunnels, and get them to dig diagonally upwards in the direction of the slope. They won't go anywhere, but they will keep finding jewels.
