Basically Anybody May Distribute This Archive So Long As ALL Files Are Included, The Archive May NOT Be Changed In Any Manner (It Must Stay As The Lha Unless With Wriiten Permission From Danny Shepherd), None Of The Files May Be Changed, Decompiled Or Disassembled.

The Source Code And Copyrights To File Magic Are Available From Danny

Shepherd E-Mail dannys@postmaster.co.uk

1.8 File Magic Guide - Introduction

Introduction.

Have You Ever Been Poking Around Your Hard Drive And Finding Those Odd Files That You Just Don't Know Which Format Their In Or Which Program Made Them? Maybe You Would Like To Play That Mod But Just Can't Be Bothered To Search Through The Many Levels Of Your HardDrive Looking For That Mod Player. Or Maybe You Just Want To Encrypt A File To Hide From Prying Eyes. Or You Could Want To Start An Editor Quickly And Easily. If Any Of The Above Apply To You Then File Magic Is Most Definatly The Utility For You Because It Can Quickly And Easily Cope With All Of The Above Problems.

1.9 File Magic Guide - Features

Features

Here Are Just Some Of The Many Features Packed Into FileMagic!

P.F.E - Professional File Encrypter - Can Safely Encrypt Any File

With Either A Typed Cipher Or Using Another File As One!

MultiFile - A Util That Can Identify Over 60 Differant File Types And

Run The Specified Executable - Perfect For Those Unknown

Files!

Sample Player - A Small Util Who's Only Job Is Play Samples. And It Does

That Job Well With Ability To Play Large Samples Straight

From Disk!

Picture Viewer - This Function Identifies The Picture Type Given And Then

Selects An Appropriate Viewer!

MOD Player - Give This Util A Mod File And It Will Be Played

Back For Your Enjoyment - No More Hunting For That Mod

Player.

File Deleter - A Simple Front End For The Delete Command.

Disk Copier - A New Front End For The DiskCopy Command.

Disk Relabeler - A Simple Front End For The Relabel Command.

Disk Formater - A New Front End For The Format Command.

Preferences - The Preferences Is Global Util Storing The Names Of All

The Executables Called For By The Utils Above.
