1.2 Object: Task

```
OBJECT
Name:   Task
Module: Kernel
Version: 1
Type:    Complex

DESCRIPTION
This  object  is  off limits to normal programs, and is only for use by the
system  modules.   The most a normal program will do with this structure is
pass  it  around  functions  that ask for it.  If you want to get some data
from a Task structure, make sure you use the appropriate function to do so.
