

# Preparing a MacPaint file

126476\_PixelRule.tiff ↵

166998\_12ptHevBlk.tiff ↵ Transfer the MacPaint file (only the data fork is needed) to your NeXT. 577765\_paste.tiff ↵ If you do this with telecommunications software, you must transfer the MacPaint file as a binary file. 241915\_paste.tiff ↵ If you like, add one of the file extensions Convert MacPaint understands.  
04\_12ptHevBlk.tiff ↵ Convert the file normally
