Setting the character conversion

247955_PixelRule.tiff ¬

166998_12ptHevBlk.tiff ¬   Choose Info from the main menu.
577765_paste.tiff ¬ Choose Preferences from the Info menu.
241915_paste.tiff ¬ Choose `Convert chars in all type families' if you want all text in the resulting eps file to be converted to a NeXTSTEP character encoding.

832592_paste.tiff ¬

431541_PixelRule.tiff ¬

808281_CheckMark.tiff ¬   When certain   `standard' Mac type families (e.g. Chicago, Helvetica, etc) are used, Convert PICT always converts the characters, as best it can, to NEXTSTEP characters (this way, what looked like a Mac bullet (·) will appear as a bullet on the NeXT and not a ¥ symbol)

172630_CheckMark.tiff ¬   When Convert PICT encounters text in a `non-standard' family, it will convert the characters only if the `Convert chars in all type families' option is checked.   Otherwise, it does not change the text.
