All Rights are reserved.

For more information on any of the copyrights, please see the accompanying source code. Also, I'm not perfect, and a little disorganized, so if you happen to catch some place I missed, or missused a copyright notice, then please e-mail immediately. I don't want to short anyone of their right or recognition to their code.

- \* This does not include libraries and code used in writting the converters, only the code written to use them. See indivual copyrights for libraries.
