

Menus

Apple Menu

The Apple Menu gives you information about Euro Assistant Pro and lets you register your copy of Euro Assistant Pro. It also lists the desk accessories and the files in the "Apple Menu Items" folder.

- About Euro Assistant Pro...

Displays the "About Euro Assistant Pro" dialog box, which provides information about the current version of Euro Assistant Pro, about shareware fees and about how to contact MaBaSoft.

By clicking the "Register Online" button in the "About Euro Assistant Pro" box, you can register online your copy of Euro Assistant Pro.

- Register Euro Assistant Pro...

Displays the "Register Euro Assistant Pro" dialog box. Type in your serial number and user name exactly as they appear in the MaBaSoft Registration letter and click the "Register" button to register your copy of Euro Assistant Pro. The "Register Euro Assistant Pro..." command is not displayed if your copy of Euro Assistant Pro is registered.

File Menu

The File Menu commands let you configure Euro Assistant Pro, update euro exchange rates, import values from text files and save, export or print the Tape window's content.

- Language submenu

The Language submenu is available just in the multilingual version of Euro Assistant Pro. It lets you choose the language for menus, windows, dialog and alert boxes (English, German, French, Italian, Dutch, Danish, Swedish and

Finnish).

If you want to run Euro Assistant Pro in Japanese, you should download the Japanese version of Euro Assistant Pro, which is available at <http://www.k-inet.com/MaBaSoft/download.html>.

- Switch Currency submenu

Lists the Euro Assistant Pro 22 predefined currencies and, if any, your custom currencies (see [Defining a Custom Currency](#)) and lets you switch to a different currency in the active display (see [Euro Assistant Pro Window](#)).

The active currency is checked in the "Switch Currency" submenu. The currencies which are already listed in the Euro Assistant Pro window are disabled.

- Add Currency submenu

Lists the Euro Assistant Pro 22 predefined currencies and, if any, your custom currencies (see [Defining a Custom Currency](#)) and lets you add a new display and currency to the Euro Assistant Pro window.

Disabled if 12 currencies are listed in the Euro Assistant Pro window.

- Remove Currency

Removes the active display and currency from the Euro Assistant Pro window. Disabled if just two currencies are listed in the Euro Assistant Pro window.

- Base Currency submenu

Lists the Euro Assistant Pro 22 predefined currencies and, if any, your custom currencies (see [Defining a Custom Currency](#)). It lets you switch to a different base currency (see [Base Currency](#)) or change the way exchange rates are displayed in the Rate button and in text clippings obtained by dragging and dropping ISO codes (see [Euro Assistant Pro Window](#)).

- Currencies...

Opens the "Currencies" dialog box, which gathers all information concerning Euro Assistant Pro's currencies (ISO codes, conversion or exchange rates, rounding, modification dates).

The "Currencies" dialog box lets you edit non-EMU currencies exchange rates, specify roundings and define or delete custom currencies. See also [Currencies Dialog Box](#) and [Defining a Custom Currency](#).

- Update Rates...

Opens the "Update Rates" dialog box, which lets you update euro exchange rates of non-EMU currencies over the Internet (see [Internet Update of Euro Rates](#)).

- Show Tape/Hide Tape

Displays or hides the Tape window. See also [Tape Window](#).

- Save Tape...

Lets you save the content of the Tape window to a text file. Five different tape formats are available. Disabled if the Tape window is hidden or if it is empty. See also [Tape Window](#).

- Page Setup...

Displays the "Page Setup" dialog box and lets you specify the printing format and quality.

- Print Tape...

Lets you print the content of the Tape Window. Disabled if the Tape window is hidden or if it is empty. See also [Tape Window](#).

- Import...

Lets you specify a text file containing a list of numeric values and an input currency. During importation numeric values are automatically inserted in the input currency's display and converted. At the end of the importation the Euro Assistant Pro window shows the last imported value and the Tape window contains all calculated conversions. See also [Calculating Series Conversions: Importation](#).

- Iconize/De-iconize

Lets you iconize or de-iconize the Euro Assistant Pro window. See also [Iconizing the Euro Assistant Pro Window](#).

- Quit

Quits Euro Assistant Pro.

Edit Menu

The Edit Menu commands enable you to edit the active display's content, to undo the last performed action, to clear and advance the Tape and to edit the Euro Assistant Pro preferences.

- Undo

Cancels the effect of the last performed action. Disabled if the last action cannot be undone.

- Cut

Copies the content of the active display in the Euro Assistant Pro window to the clipboard and zeroes all displays.

- Copy

Copies the content of the active display in the Euro Assistant Pro window to the clipboard.

- Paste

Copies the content of the clipboard to the active display in the Euro Assistant Pro window and calculates all other displayed currencies' equivalents.

If the clipboard's content is an algebraic expression (e.g. $32+55.5+18*2$), Euro Assistant Pro pastes the expression's result (e.g. 123.5) in the active display (see also [Calculating and Converting Expressions](#)).

If the clipboard's content is not suitable for being inserted into the active display, zero is pasted.

- Clear

Zeroes all displays in the Euro Assistant Pro window.

- Clear Tape

Clears the Tape window's content. Disabled if the Tape window is hidden or if it is empty.

- Advance Tape

Inserts a blank line in the tape. See also [Tape Window](#).

- Preferences...

Opens the "Preferences" dialog box. See also [Preferences](#).
