

# About MiniCalendar

---

What makes MiniCalendar unique

What makes Minicalendar unique is it has a clean design and it is easy to use. MiniCalendar has two main user interface elements: windows and menus.

## Windows

### Calendar View Window

The Calendar Window is the main window, as its name implies, it displays the calendar.

To increase or decrease the size of the Calendar window simply press and hold the Command key and then press either the Up arrow to increase or Down arrow to decrease the size. You can increase the size of the Calendar window a maximum of 4x.

### Set Date Dialog

The "Set Date Dialog" is used for jumping from one calendar to another. To change dates, choose the month from the popup menu and enter the desired year. The year needs to be between 1582 and 29940.

## About Box

The About box displays information about the environment MiniCalendar is running in. The following is a brief description of the information provided:

### Free Memory

This is the current amount of free memory MiniCalendar has available.

### Application Version

This is the version of MiniCalendar you are currently running.

### System Version

This is the version of MacOS you are currently running.

### Registered To:

This is the name of the user MiniCalendar is registered to.

## Preferences

The Preferences dialog box allows you to configure MiniCalendar any way you want. More information is provided in the Configuring MiniCalendar section.

## Menus

MiniCalendar has three main menus you will use on a regular basis. They include the File Menu, the Edit Menu, and the Date Menu.

### File Menu

lose

Closes the front most window. If the Calendar Window is the front window, the MiniCalendar program quits.

Export Calendar as...

Saves the current Calendar view into a graphics file of the specified format. You must have QuickTime 4.0 installed and have the QuickTime "Still Image" component to use this feature. If you cannot export the Calendar run the QuickTime Updater program and click on the "Custom" button in the second window to download the required component.

Register

Allows you to enter your personal Registration Information to disable the ShareWare notice and to enable the Export menu.

Quit

Quits from MiniCalendar.

Edit Menu

opy

Copies a picture of the current calendar to the clipboard.

Preferences

Opens the preferences dialog box.
