

The Keeper Beta 3

The Keeper will let you open your saved game and continue files and edit the level you are on. This lets you go to any level you wish (Up or Down).

The Save Files are located in your "Keeper/Save" Directory of the drive you installed the game.

The Save Files are Named "Game0000.Sav" Through "Game0007.Sav".

The Continue File is also located in your "Keeper/Save" Directory.

The Continue File is "Continue.Sav"

Editing GOLD!

When editing gold you must first build something or have spent money. Then save the game and edit!

Levels and Gold!

Also changing levels reset the game and the money! So, if you want to go to a level with a lot of gold you must change levels, go in to the game and spend some gold, save it, and then edit the gold.
