Chapter 14
Tools

MenuTools.tiff ¬

Elements...

Brings up the Element Creator panel if it isn't already on-screen. (See Chapter 15 for a discussion of the various Element Creator palettes.)

Inspector...

Brings up the Inspector panel if it isn't already on-screen. (See Chapters 16±17 for a discussion of EquationBuilder's various inspectors.)

Colors...

Brings up the standard NeXT Color panel. You can use this panel to change the color of an equation by simply dragging over a color swatch from the Color panel and dropping it onto the equation. You can also use the Color panel to set a new default text color in the Preferences panel (see Chapter 11).
