

Addendum

The following details additions, changes and corrections that have been made since the manual was printed.

- Correction to Chapter 1: Installing the Pixel Magician Application, page 6, item 8:

Sample pictures are located in a subdirectory in the **PixelMagician.app** directory called **SamplePictures**. Use the Workspace Manager's

^aOpen as Folder^o command to open the **PixelMagician.app** directory.

- Correction to Chapter 2: Pixel Magician Commands, page 10:

The Help command now uses the Workspace Manager to open a file browser containing the User Manual.

- Corrections to Chapter 6: Supported File Formats/Output Options, page 63:

Truvision should be spelled Truevision.

Reads

1±8 bit paletted, 8 bit gray

15, 16, 24, 32 bit RGB w/ alpha

Writes

1, 2, 4, 8 bit paletted, 8 bit gray
15, 16, 24, 32 bit RGB w/ alpha

- Addition to Chapter 6: Supported File Formats/Output Options:
Added **JPEG (JFIF)** support.
- Addition to Appendix D: Frequently Asked Questions:

When I make an image with transparency paletted, I can't change the background color. Why is this?

- Addition to Acknowledgments:

JPEG Support
