

## Emacs-style Key Bindings:

Here is the list of the emacs-style key commands that Schematik implements. Most are cursor movement commands.

<u>Key</u>	<u>Action</u>
Control-a	move to beginning of line
Control-b	move backward one character
Control-d	delete next character
Control-e	move to end of line
Control-f	move forward one character

Control-h	delete previous character
Control-i/Tab	indent line/selection
Control-j	newline; always non-indenting
Control-k	cut forward to end of line
Control-m	carriage return (same as Return)
Control-n	move down one line
Control-p	move up one line
Control-y	paste
