

*Inspector:*

There is a different inspector for each of the following items:

Plot: change the plot type and auto-placement of items.

Grid: change the axis ranges, grid and ticks.

Text: change the color, rotation, alignment and border of text fields.

Number Lines: select default number lines.

Axes: select default axis and change the width of an axis.

Sound: record sound to be included in the plot.

Arrows: change the position and width of arrows.

Legend:                      select border style.

The inspector automatically changes to its appropriate form when an item is selected.

Notes on Coordinates:

All labels are attached to graph coordinates.

Axes and number lines are attached to screen coordinates, but scaled to graph coordinates.

Arrows are attached to graph coordinates.
