

description

self

qualifier (EOEntity)

entity (EOQualifier)

(NSString \*)description

Returns a string object that represents the contents of the fault object, without causing it to fetch its data. The fault's description contains the name of its entity and the value of its primary key and an array of fault's descriptors and the qualifier used to fetch its objects.

self

Causes the fault object to fetch its data and return self. You can use this message to force a fault object to fetch its data immediately.
