

```
handleFailureInFunction:file:lineNumber:description:  
    handleFailureInMethod:object:file:  
        lineNumber:description:
```

```
(void)handleFailureInFunction:(NSString *)functionName  
    file:(NSString *)fileName  
    lineNumber:(int)line  
    description:(NSString *)formattedString,  
    ...
```

This method logs an error message that includes the function, file, and line number and then raises an exception.

```
(void)handleFailureInMethod:(SEL)methodSelector  
    object:anObject  
    file:(NSString *)fileName  
    lineNumber:(int)line  
    description:(NSString *)formattedString,  
    ...
```

This method logs an error message that includes the class, method, file, and line number and then raises an exception.
