

## Outline and Fill

The outline and fill controls are in the same image control panel. Since you can't fill the text unless it has been outlined, choosing the **Fill** option will also choose the **Outline** option and deselecting the **Outline** option will automatically deselect the **Fill** option. Also, when you've chosen one of these options, the Text Gray Level control in the Main Parameters Panel doesn't affect the appearance of the text.
