

Mode

The mode controls the basic placement of the text. For example, **Basic** places the text in a straight line, while **Circle** places the text around the circumference of a circle. See Help topics for the individual modes for descriptions of the choices available for each mode. All **Options** can be applied to each mode to achieve various effects.

To choose a mode:

Click on the appropriate radio button in the Main Parameters Panel

or

Select the appropriate mode from the **Mode** menu under the Image menu.

or

Use the appropriate command key shortcut:

Basic	Command-B
Rose	Command-R
Circle	Command-C
Upper Arc	Command-U
Lower Arc	Command-A
