

Outline Options

The Outline Width slider and text field control the thickness of the text's outline. This slider provides you with feedback on the line width you're choosing. Its default is 0.2 points.

You can set the color of the outline using the Outline Gray control. Its default is Black.

The Top Copy Only checkbox applies when you've also chosen the Multiple option or the Rose mode. When checked, only the top copy is outlined or filled. You can set the gray levels of the remaining copies from the Multiple Option control panel or the Rose Settings panel.

TextArt: The Manual:

Outline	p. 24
Multiple	p. 29
Rose mode	p. 17
