Here are some more colorized App icons I've done.   These are for Gnuplot and ImagePortfolio.   To replace the old icons with these, use the following commands in a Terminal/Stuart window... (pardon the line wrap)

Gnuplot:
mv ~/Apps/Gnuplot.app/Gnuplot ~/Apps/Gnuplot.app/Gnuplot-OLD
segedit ~/Apps/Gnuplot.app/Gnuplot-OLD -replace __ICON app Gnuplot.tiff -replace __ICON GnuplotDoc GnuplotDoc.tiff -output ~/Apps/Gnuplot.app/Gnuplot
rm ~/Apps/Gnuplot-OLD

ImagePortfolio:
mv ~/Apps/ImagePortfolio.app/ImagePortfolio ~/Apps/ImagePortfolio.app/ImagePortfolio-OLD
segedit ~/Apps/ImagePortfolio.app/ImagePortfolio-OLD -replace __ICON doc portfolio.tiff -output

~/Apps/ImagePortfolio.app/ImagePortfolio
rm ~/Apps/ImagePortfolio-OLD

Here they are!
