**Subject:** sploogie the live splat (and it's alter ego)

Cooked up these morsels in Appsoft Image (a great product, by the way). He started out fairly simple, but a good waste of time managed to enhance his features. I'm sure he'll metamorphose into some offspring at some point.

**Subject:** Here Comes the Sun King

Hi everybody,

Here are a couple of icons based on an original PostScript image by

computer artist **Chuck Higbee** of advertising firm **Temerlin McClain** in Dallas. I used WetPaint to iconify and touch up the images.

**SunKing.dir.tiff**

**SunKing.opendir.tiff**

Hope you like these!
