Aloe: the healing plant. Some folks that I work with really wanted this in an icon; who am I to refuse such a request?

This image was scanned from the cover of "The Miracle of Aloe," apparently some program guide from the 20th World Congress of Natural Medicines, held in Madras, India, a veritable UNIX Expo of the aloe world. I can't vouch for the plant, but it's shampoo is good. However, if someone offers you a drink made with the aloe juice, take a rain check; it tastes like someone else's old saliva. Processed in the usual way with the usual tools running on the much-improved NEXTSTEP 3.2.

2- and 24-bit images, sharpened and not sharpened:

Hi everybody

I think this list has lost much of its activity the past months. (Including mine.) The only one who is keeping up the good work is Timothy and I would like to thank him for all his jobb with the list under 1992. Keep up the good jobb.

Here is a Rose

Thanks Tim

The icon was made under a DevCamp I held by one of the participants Ronny Wester.

The following are loose imitations of art glass motifs by L.C. Tiffany (how

could they be other than loose in 48x48?). Enjoy:
