Subject: experimental code dirs

(This bounced the first time)

We use these icons at work to represent our experimental subprojects directory. I'd've liked it better if the opendir had the suitcase opened as well.

This is basically just two icons stacked on each other. (The flask icon may have occurred on this list before. I'm new around here, so i'm not too sure.)

(disclaimer, I didn't actually create (the merger of) these icons)

Subject: Projects Directory Icon

Hi all,

I couldn't find a tiff for a project directory that had everything I wanted, so I threw this one together:

Enjoy,

-Scott Violet (scott@nacm.com)
