**Subject:** Magic the Gathering Icons (take 2)

Enclosed are a couple of .tiff files I use for my **Magic: The Gathering** bookshelf. Magic is one of those games where you can spend a lot of time scanning though discussions and FAQs. Its also popular on the net (check out rec.games.board for the billions of posts and flames). The .dir.tiff is based on the card back (Magic is a kind of card game). I've ztiff'd these icons. Sorry about the earlier, incorrect post.

These icons are copyrighted, I'm sure, but if they're for your own use, USE THEM!

If anyone has others, I'm interested. I also have the larger originals, if anyone is interest.

These were scanned using eXTRASCAN, and scaled using Tiffany III! Have fun!
