**Subject:** weather related icons

being the computer support person for a group in our atmospheric science dept, i've come up with some directory icons we use on our NeXT network:

i also have some larger tiffs of weather map symbols, a eps image of the whole earth while hurricane emily was getting started and a tiff of colorado forecast zones if you're interested.

i also have a few other icons for specific data directories if anyone is interested.

can't get enough of severe weather out here.  
chase season is around the corner...
