**Reply-To:** treed@gun.com

I'm not sure why anyone would want this (once you've used OSF/1, you'll understand even more why I ask -:) but here it is. Only of use in the most depressed of heterogenous environments.

Someone had posted an Illustrator document with this a while ago - this was taken directly from that logo. Copied from the Illustrator document and pasted into TIFFany, then alpha'ed in IconBuilder. TIFFany sizes a pasted selection to the document you're pasting into - a useful effect in this case.

No color.

Tim

Icon art imitates life too! Here's the OSF, dissolving. Next up will be ACE and COSE, also dissolving. Use this icon with the one I posted earlier.  
Sorry about this - I just couldn't resist -:) -:)
