Christina Applegate

This is big US TV star Christina Applegate on a little TV. I don't know how the original image ended up in my home directory, but I cut the TV with Christina on it out and did general image processing-type stuff with TIFFany 2, and the final cleanup in IconMaker. The obvious .opendir.tiff should be a screenful of static, but I'm too lazy.

This icon is sized just right for Mail.app. If you look like Christina Applegate or just really like TV, this one's for you.

	The directory icon. This	
The mail picture:	didn't come out well:	The big version:
