Hey, I just downloaded the archives from orst the other day. Mondo cool stuff, though I KNOW that some of those icons haven't been posted since the last major archiving. Are people keeping stuff from us?

But the one big puzzle for me is... WHY is a DETERGENT bottle the icon of choice for the main directory? Does Tim have an even odder sense of humor than most of us out here

in net.land? (And if he does, that's ONE WEIRD SENSE OF HUMOR!)

Anyway, I wasted a bit of valuable study time (heh, heh) and came up with my visualization of the main next-icon directory tiffs.
