Subject: C++ Icon

Here is a C++ icon that I had put together a while back....

This has 2bit and 12 bit. I don't like the 2bit version, but I haven't had time to clean it up....

Subject: Icons for C, C++ (C++ on a NeXT??), and Objective C
directories

**These are just something I threw together so I didn't have the
standard**

folders for all my directories. They are all in 2, 8, and 12
bit, though
they don't look too good in 2 bit.
