These are from ICONgallery, available from Trident Data Systems.

The artwork is by Madeleine Bryan.

ICONgallery is a terrific image manager.

**Plus, it contains over 400 high-quality icons,
many of which are animated.**

And the best "grab" interface around.

Available for NEXTSTEP 3.x, Intel or Motorola.

The price for a single-user license is only \$99.

Call or e-mail for more info.

I just made some Pumpkin Lager Beer and I want to make a cool label for the bottles.
So, if anyone has Pumpkin or Fall Scenery images (*.tiff, *.gif, etc.),
please email them to me.

Thanks.

Hi,
I just completed installing some new management software for the next-icon list. I'll post a complete description of the changes and end-user features of the software when I have time tonight or tomorrow evening. Suffice to say that I tested the list management software this weekend and found it to be far more powerful and practical than I expected. And as an extra bonus, the software works.

Briefly, the new next-icon list will filter out most "subscribe" and "unsubscribe" messages, and allow you to retrieve old postings from the archives.

Anyway, Alice Baumann posted the following to the list before I had put all the subscribers on it. Sorry to the list testers who are receiving the attached message a second time.

Tim
