Subject: Duckman

wait a second, let me (cough! cough!) brush the dust off this mailing list....

I just got a new computer at work and have named it duckman after my new favorite cartoon. Of course the first thing I had to do was create machine icons. So...

<duckman.dir.tiff>
<duckman.opendir.tiff>

The whole body pose behind these facial shots was even better for closed/open, but just too much picture for 48x48. BTW, there is a Duckman web page at <http://bluejay.creighton.edu/~jduche/duckman.html> which is where I got the original images.
