**Subject:** Tabbed folders, lifted webster icons

Here's a few things I worked on this weekend:

<font-folder.dir.tiff>  
<snd-folder.dir.tiff>  
<tiff-folder.dir.tiff>  
<net-folder.dir.tiff>

First, I wanted to see how easy it would be to twist an image around and make little labeled tabs on normal folders. Here's a few that I did; all 2-bit:

They turned out OK, and it wasn't very difficult.

I just warped the normal font, snd, and tiff icons a bit and then cut and paste using Icon.app

Enjoy
