Subject: More Icons

This list has been awful quite lately.
To liven things up, here's a number of icons I've made for sub-
folder of my LocalApps folder.
Some people claim that there are few apps for NeXT. But there are
enough that throwing them all into a single folder just got to be
too much. So I divided all the apps by category, and made these
icons to identify them. (BTW, any sub-folders of LocalApps are
automatically placed in the app search path, so putting apps in
sub-folders does not cause any problems).

Communications:	Database:
Drawing:	Emulators:

Games: ImageView:

MathStats: Misc:

MusicSound: Plotting:

Utilities: WordProcessing:

Enjoy. Feel free to redistribute them, although I'd appreciate if you'd give me credit if you do so.

Ciao, Stefano
