Subject: Color LockBox

Hi,

This is a color version of LockBox posted a while ago to this list. It contains both color and mono versions of the icon. No opendir.tiff with this one, tho' I guess that you could copy this to .opendir.tiff, since a folder with this icon shouldn't have much writing done to it anyway -:)

Doing this one highlights the dramatic differences between the Nextstation and ND color. This icon colorations (extrapolate: any color image) change dramatically and unintentionally when viewed on a Nextstation. Very surprising - I never really gauged how much real-life differences existed until recently.

Later,

Tim
