Hi,
Now that I've finally acquired a scanner, you'll all have to suffer through a set of new app and directory icons. The first ones come from a postcard of British comic book character Tank Girl. I have a better image from an old Deadline magazine poster of Tank smoking a cigar and holding a molotov cocktail while riding a bomb, but it's too big to feed thru the scanner.

Speaking of scanners, I haven't dealt with NEXTSTEP drivers yet (these were scanned on a 95 machine) but would like to hang this thing directly off my cube. I'd appreciate any recommendations on free, shareware or commercial drivers for the HP Scanjet. Thanks in advance.

Enjoy,
Tim
