**Subject:** Next{Admin,Apps,Developer,Library} Directory Icons

Howdy all:

As my first submission to this M-List, I've put together a set of four (and a half) pairs of icons for use in the standard NeXT directories: /NextAdmin, /NextApps, /NextDeveloper, /NextLibrary. I didn't include a /NextTour or /NextDemos cause I don't have those directories...

They are in both 2-bit and 12-bit, but the color ones might be a bit off 'cause I don't have a color machine to try them on. Someone please fix and return the fixed versions to me and the group.

I've seen the /Next\* icons that other people have distributed (the ones with the NeXT cube and words down the side), but I didn't like the words much, so I developed these:

Remember the folder icons back in NS1.0? They were 2 bit mono, of course. They had buckles on them instead of elastic straps. They were were thinner, and not as well drawn as the current icons.

Well, they're back! I just finished touching up a set and colorizing them. They don't look too bad now. For all those interested, here they are!

Joe
